Michael

I was discussing your case with some legal experts. The question in everyone's mind is what is making you pursue the case in US courts? It will unnecessarily waste your money and more valuable my time.

One expert felt that you may be mentally unstable another felt that you trying to put up a brave fighting face when your company is slipping into bankruptcy.

However I feel it's a typical of a person who sits on the ready made business of dad for free; with no real business acumen.

So let's say by an act of God you are able to get a favorable order may be say within 1 year. Do you think you will get it serviced in other country? We will oppose it at every level.

I guess you have forgotten you are a designated criminal in this country and possibly in Lanka. accused of theft etc.

May be you are trying to get a subpoena on Google to exclude some web sites. If you do that max you may exclude 10-15 links. **What about another 3000 links.** We are trying to get exactly the same thing for DNO and EA . Google tells us to get subpoena and claims protection under "safe Harbor" The case here is pending but I know It is of no real consequence as you may start a backup site in hours

We too are ready with high potential backup sites which will be pushed in Google and will be on first page within 1 month .

In coming months you will see high intensity campaign by us to expose you.

In all this mess ; as every day passes you are getting deeper and deeper in financial mess. I have your credit report with details till the last \$ how much you have borrowed.

PPC expenses are killing you and soon you will NOT able to pay your employees

; Your sales have crashed to the lowest

But now it's too late. Even you beg before me I cannot help
